Prepared by the Commodity and Trade Analysis Branch, Commodity Economics Division, Economic Research Service, U.S. Department of Agriculture. Principal coordinators are Cecil W. Davison and Mary L. Fant. Lilia George provides word processing and table formatting support. Editorial support is furnished by Martha R. Evans, Current Information and Popular Publications Branch, Information Division, Economics Management Staff. Data processing support is provided by Sharlan Starr and William Meiller, Agriculture and Trade Analysis Systems Branch, Data Services Center.

Digest

Agricultural Exports Decline in 1993 (see p. 2)--U.S. agricultural exports dropped \$320 million to \$42.6 billion in 1993, but were still the third highest ever. In 1981, exports totaled \$43.3 billion and last year, \$42.9 billion. Exports declined because of a \$1.1-billion drop in bulk commodities to \$18.2 billion. High-value product exports partially offset the decline in bulk commodities by growing nearly \$800 million to \$24.4 billion.

U.S. Agricultural Imports Increase Slightly to Record High (see p. 5)--Agricultural imports increased by \$357 million, or 1.5 percent in 1993. Competitive product imports rose \$416 million to \$19.4 billion and non-competitive imports fell \$60 million to \$5.6 billion. Competitive imports made up 78 percent of the total.

U.S. Agricultural Exports to Major Markets Up Slightly in FY 1993 (see p. 7)--U.S. agricultural exports totaled \$42.6 billion in FY 1993, up slightly from \$42.4 billion the previous year. Japan continued to be the top market, followed by Canada, Mexico, South Korea, Taiwan, the Netherlands, the former Soviet Union (FSU), and Germany. Sixty-one percent of U.S. agricultural exports went to these billion-dollar markets in 1993. The FSU slipped from fourth to seventh place as its purchases of U.S. agricultural exports fell 42 percent from 1992. Feed grains and products led in export value (15 percent of total), followed by soybeans and products (14 percent), wheat and products (12 percent), and live animals and meat (9 percent).

The United States Department of Agriculture (USDA) prohibits discrimination in its programs on the basis of race, color, national origin, sex, religion, age, disability, political beliefs and marital or familial status. (Not all prohibited bases apply to all programs). Persons with disabilities who require alternative means for communication of program information (braille, large print, audiotape, etc.) should contact the USDA Office of Communications at (202) 720-5881 (voice) or (202) 720-7808 (TDD).

To file a complaint, write the Secretary of Agriculture, U.S. Department of Agriculture, Washington, D.C., 20250, or call (202) 720-7327 (voice) or (202) 720-1127 (TDD). USDA is an equal opportunity employer.

Agricultural Exports Decline in 1993

U.S. agricultural exports dropped \$320 million to \$42.6 billion in 1993, but were still the third highest ever. In 1981, exports totaled \$43.3 billion and last year, \$42.9 billion. Exports declined because of a \$1.1-billion drop in bulk commodities to \$18.2 billion. High-value product exports partially offset the decline in bulk commodities by growing nearly \$800 million to \$24.4 billion.

Beef exports declined 2 percent to just under \$2 billion because of a \$95-million and \$61-million drop in exports to Mexico and Korea, respectively, negating a \$120-million gain to Japan. But expanded pork exports kept total meat exports at last year's \$3.3 billion. Pork exports received a substantial boost in the last quarter of 1993 with sales to the former Soviet Union (FSU). The United States shipped the FSU nearly \$26 million worth of pork in 1993, compared with \$340,000 in 1992. Poultry meat exports jumped 19 percent to \$1.1 billion on continued gains to Mexico, the Middle East, and Hong Kong. Dairy exports increased 4 percent to over \$750 million on expanded sales to Mexico through the Dairy Export Incentive Program. Hides and skins trade fell 5 percent to \$1.3 billion as slow economic growth lowered the demand for leather goods world-wide.

Fruit, nut, and vegetable exports grew by 7 percent to \$7.2 billion, however, growth was primarily in vegetables. Fruit and fruit juice exports increased slightly over 1 percent to \$2.8 billion, and nuts rose 4 percent to \$1.2 billion. Vegetable exports soared by 14 percent to \$3.3 billion. Fresh vegetables rose 9 percent on large gains in broccoli, cabbage, celery, garlic, lettuce, and onions. The strongest gains were in exports of highly processed vegetables, rising 22 percent to \$1.5 billion. This group of vegetables has been the fastest growing over the past several years, and the expansion is spread among all markets.

Exports of tropical products (coffee, cocoa, chocolate, tea, and spices) rose 25 percent to over \$700 million. Chocolate and preparations exports

led with over \$335 million from \$244 million in 1992. The largest gain in chocolate was to the FSU as imports from the United States jumped to over \$75 million from \$2 million in 1992.

Bulk commodity export value fell nearly \$1.1 billion, a 6-percent drop from the previous year, as feed grains, cotton, and tobacco fell significantly. However, wheat, rice, and soybean exports gained in value. Bulk volume declined 3 million tons to 108 million tons.

Feed grain exports dropped by approximately 5 million tons, with a value of \$700 million. Corn shipments to Mexico, the FSU, Korea, and South Africa were down sharply. Sorghum also dropped as Mexico imported 1.3 million fewer tons than in 1992. Tobacco and cotton value fell 21 percent and 24 percent, respectively. Tobacco shipments declined to almost every market. Cotton to Asian and European markets fell as plentiful world supplies squeezed cotton exports. However, there were gains in U.S. cotton exports to Latin America, particularly Mexico and Brazil.

Wheat exports rose to 35.6 million tons, valued at \$4.7 billion. Although there were declines to China, the FSU, and Japan, expanded shipments to Latin America, Southeast Asia, and Africa more than offset the declines. Rice exports increased almost 600,000 tons, valued at nearly \$800 million. The United States exported 30,000 tons to Japan in 1993, but gains to other markets pushed rice higher in 1993. The largest gain was to Iran which imported 200,000 tons of rice, up from 46,000 in 1992. Exports also grew to Latin America, Europe, and Africa.

Soybean export volume fell 400,000 tons to 19.4 million tons, but higher export unit values bolstered soybean value to \$4.6 billion, a gain of 5 percent. Exports to Canada increased because of the reduced Canadian soybean and rapeseed crop in 1992. Exports also expanded to Southeast Asia. Shipments were down to Mexico, Europe, and Korea. *(Joel Greene, Commodity and Trade Analysis Branch, 202-219-0822)*

Table 1--Agricultural, nonagricultural, and total trade balance of exports and imports

U.S. Agricultural Imports Increase Slightly to Record High

Agricultural imports increased by \$357 million, or 1.5 percent in 1993. Competitive product imports rose \$416 million to \$19.4 billion and noncompetitive imports fell \$60 million to \$5.6 billion. Competitive imports made up 78 percent of the total.

Competitive Imports Up Just 1 Percent

Competitive products rose 1 percent in 1993. Fresh and frozen vegetables jumped \$300 million to \$1.4 billion, a 33-percent increase. Latin America accounted for 70 percent of shipments. Tomato shipments from Mexico were up over 200,000 tons, due to improved weather there, poor weather in Florida, and reduced U.S. acreage. Canadian fresh and frozen french fry potato shipments jumped almost 80 percent to 377,000 tons because of attractive U.S. prices. Onion shipments from Mexico rose 26 percent to 194,000 tons, over 80 percent of total onion imports. Although onion production is increasing, imports remained strong due to stock rebuilding and strong export demand for U.S. processed onions. Domestic demand is driven by the California dehydrating industry. Cucumber imports rose 25 percent, reaching 230,000 tons.

Imports of meat, excluding poultry, increased 6 percent to \$133 million. Shipments from Australia and New Zealand fell 11 percent due to voluntary trade agreements negotiated with the United States. Australia and New Zealand shipped 60 percent of U.S. imports. Canada shipped about 20 percent, valued at \$300 million, and Argentina shipped \$110 million. Live cattle imports rose 11 percent to 2.5 million head. Mexico and Canada each shipped about 1.2 million head as attractive U.S. prices set records in early 1993. The value of live cattle imports was up 24 percent to \$1.3 billion. Most of the Canadian cattle were for immediate slaughter and those from Mexico were feeder cattle. Total pork imports were valued at \$700 million, up 12 percent. Canadian shipments increased 8 percent to \$300 million. European Union (EU) shipments rose 68 percent, pushed by a sharp rise in Danish shipments, up 14 percent to \$169 million. Record Danish herd sizes and very low prices boosted exports. Shipments from Eastern Europe increased 16 percent.

Grain and feed imports rose to \$6.4 million tons, 18 percent over 1992. Canadian wheat shipments increased to 1.8 million tons. Limited supplies of durum and high protein premiums in the U.S. encouraged imports. Oat imports surged in 1993 to 1.5 million tons due to a high quality Canadian crop and low U.S. supplies. Lower shipments from the EU, despite a sharp increase from Finland, were dwarfed by increases from Canada. The United States dominates world oat imports. Barley imports rose in 1993 due to low U.S. supplies and a large Canadian crop.

Total fresh or frozen fruit imports increased 4 percent to 1.6 million tons in 1993. Grape imports rose slightly due to smaller California production, and fresh citrus shipments rose due to smaller orange, grapefruit, lemon, and lime crops. Shipments of peaches, berries, and apples declined. The U.S. pear crop was low, causing imports to increase. Higher shipments from Mexico increased mango imports. Chile's fresh or frozen fruit shipments, predominantly fresh grapes, were steady at 442,000 tons. Mexican fruit shipments increased 6 percent to 538,000 tons. Chile and Mexico each accounted for a third of U.S. fruit imports by value.

Fruit juice imports increased by 12 percent but value declined as prices fell 30 percent overall. Orange juice shipments rose 25 percent in response to a smaller U.S. crop caused by poor weather. Brazil accounted for 90 percent of orange juice shipments to the United States. Apple juice imports from Argentina fell slightly. Grape juice imports also declined due to lower prices.

Oilseeds and products were steady at \$1.2 billion. Flaxseed imports fell by almost a third as prices declined and U.S. supplies rose. Canadian rapeseed imports surged due to increased U.S. crushing capacity.

Overall, oil and wax imports were steady at 1.4 million tons. Coconut, rapeseed oil, and palm kernel oil imports decreased. Castor, cottonseed, palm, and olive oil imports rose. Oilcake and meal used in feed rose to 675,000 tons.

Wine imports fell 8 percent in 1993. Malt beverages, mostly beer, increased 11 percent in quantity and were valued at \$941 million, up 9 percent

from 1993. EU exports made up half the volume, and Mexico and Canada accounted for 46 percent. Tobacco leaf imports increased by 60,000 tons, as U.S. cigarette companies continued to expand production of lower quality cigarettes that use more foreign tobacco.

Noncompetitive Imports Fall 1 Percent

Noncompetitive imports fell by \$250 million to \$5.6 billion. Coffee imports led the decline, falling 16 percent to 1.1 million tons valued at \$200 million. Higher world prices caused roasters and

importers to reduce stocks rather than import beans. Cocoa imports rose 6 percent to 800,000 tons. High world production and poor economic conditions in some major importing nations have kept cocoa prices low. Banana imports were steady for 1993. Rubber, tea, and spices showed slight gains. Imports of essential oils, crude natural drugs, non-cotton fibers, and carpet wool increased in value. Noncompetitive imports accounted for 23 percent of total agricultural import value. (*Tom Capehart, Commodity and Trade Analysis Branch, 202-219-0822*)

U.S. Agricultural Exports to Major Markets Up Slightly in FY 1993

U.S. agricultural exports totaled \$42.6 billion in FY 1993, up slightly from \$42.4 billion the previous year. Japan continued to be the top market, followed by Canada, Mexico, South Korea, Taiwan, the Netherlands, the former Soviet Union (FSU), and Germany. Sixty-one percent of U.S. agricultural exports went to these billion-dollar markets in 1993. The FSU slipped from fourth to seventh place as its purchases of U.S. agricultural exports fell 42 percent from 1992. Feed grains and products led in export value (15 percent of total), followed by soybeans and products (14 percent), wheat and products (12 percent), and live animals and meat (9 percent).

Among commodity exports that changed significantly from 1992, dairy products rose 19 percent, sunflower seed and oil gained 17 percent, and vegetables and preparations advanced 15 percent. Dairy exports to Mexico expanded 32 percent (\$60 million), and to the FSU, 76 percent (\$50 million). Vegetable exports were boosted by a \$136-million increase in imports of U.S. vegetables by Canada. Like U.S. vegetable exports, U.S. wheat exports also rose more than \$400 million (over 10 percent) from 1992. Exports of U.S. cotton fell 30 percent, led by a 34-percent drop in exports to Japan.

Japan bought 20 percent of U.S. agricultural exports in FY 1993, 162 percent of the value shipped to Canada, the second-largest market. The value of U.S. agricultural products shipped to Japan was \$8.5 billion, up from \$8.4 billion in 1992. U.S. exports of live animals and meat to Japan exceeded \$2 billion, equaled \$1.7 billion for feed grains, topped \$900 million for soybeans, surpassed \$600 million for fruit and \$500 million for wheat, and topped 400 million each for feeds and fodders, and vegetables, and totaled over \$300 million for tobacco.

Japan was either the first- or second-ranked market for each major commodity group (exports totaling \$1 billion or more) except poultry and products. Japan increased its imports of U.S. meat by 13 percent, from \$1.8 billion in 1992 to \$2 billion. While imports of U.S. live animals rose \$3.5 million, imports of U.S. beef and veal rose \$193 million. Japanese imports of U.S. pork rose \$56 million. Japan's imports of U.S. cotton declined from \$386 million to \$255 million in the

face of competition from synthetic fabrics and rising cotton imports. Imports of U.S. tobacco also declined, from \$351 million to \$319 million.

Canada's purchases of U.S. agricultural products increased \$400 million to \$5.2 billion, continuing a trend encouraged by declining tariffs under the free trade agreement. Canada took around 12 percent of U.S. exports in 1993 and 1992. Canada is the top market for U.S. vegetable, fruit, and poultry exports and the second-ranked market for live animals and meat, feeds and fodders, and peanuts.

Mexico maintained its purchases of U.S. exports at nearly \$3.7 billion in value. Mexico increased imports of vegetables, fruits, cotton, dairy products, and reduced imports of U.S. feed grains, soybeans and products, live animals and meat, and hides and skins. Mexico remained the top market for U.S. exports of fats, oils, greases, dairy products, and seeds and became the top market for sunflowerseed and oil and the second largest market for U.S. poultry and products.

South Korea purchased \$2 billion in U.S. agricultural exports, down 7 percent from 1992. South Korea remained the top market for U.S. hides and skins and became the largest market for U.S. raw cotton exports. South Korea boosted its imports of U.S. soybeans and products 7 percent for 1993, advancing it from seventh place in 1992 to sixth in 1993.

Taiwan purchased \$2 billion worth of agricultural imports, up from \$1.9 billion, and was the second largest market for U.S. feed grains. Taiwan was the third largest market for soybeans and products and hides and skins, and the fourth largest market for fruit and preparations. Taiwan was the fourth largest U.S. market for feed grains, vegetables, fruit, and hides and skins in 1992.

The Netherlands, the initial destination for \$1.8 billion of U.S. exports, was the second largest market for U.S. soybeans and fats, oils, and greases, the third largest for tobacco, the fourth largest for feeds and fodders, and the fifth largest for feed grains. Many of these exports were routed from the Netherlands to other destinations. The Netherlands was the leading initial destination for U.S. peanut exports during 1993 and 1992.

FSU purchases of U.S. agricultural exports fell 79 percent (from \$2.7 billion to \$1.6 billion), lowering

that market from fourth to seventh place.

Although FSU imports of U.S. wheat and flour fell from \$1 billion to \$0.6 billion, the FSU maintained the position of the largest market for U.S. wheat exports. U.S. feed grains, wheat, and soybeans constituted over 78 percent of exports to the FSU in 1993.

Germany took \$1.1 billion of U.S. exports, up 5 percent from 1992. Germany maintained its position as the top market for U.S. tree nut exports and the second largest market for unmanufactured tobacco. It is also a major market for exports of U.S. soybeans, fruit, vegetables, and feeds and fodders.

Feed Grains and Soybeans Lead Commodity Exports

Feed grains, soybeans, and wheat led U.S. commodity exports in 1993, followed by live animals and meat, vegetables, fruit, cotton, tobacco, poultry and products, hides and skins, and feeds and fodders. Feed grains, soybeans, and wheat made up 41 percent of U.S. agricultural export value in 1993 and 1992. Feed grains and products accounted for 15 percent of the value (\$6.3 billion) in 1993 and 16 percent in 1992. Japan, traditionally the largest market, took 27 percent of U.S. feed grain exports during 1993 and 26 percent in 1992. Mexico was the third largest market in 1993 and second in 1992.

Exports of soybeans and products, at 14 percent (\$6 billion) of total U.S. agricultural export value in 1993 and 1992, rose \$54 million (1 percent) from 1992. Japan and the Netherlands, the largest customers, received 16 and 12 percent, respectively, of U.S. soybean exports in 1993. Taiwan increased its purchases of U.S. soybeans and products by 20 percent, gaining third place.

Wheat and wheat products made up 12 percent (\$5.0 billion) of all U.S. agricultural commodity exports during 1993. In 1993, FSU purchases of U.S. wheat, primarily from the Export Enhancement Program and the GSM export credit guarantee program, supported the FSU as the leading market. Japan remained the second-largest U.S. wheat market. During 1992, the FSU was the top market for U.S. wheat, taking 23 percent, and Japan was second, with 12 percent. Morocco increased imports of U.S. wheat \$168 million to \$233 million, moving from 13th place in 1992 to 5th in 1993.

Japan purchased 54 percent of the \$3.7 billion of live animals and meat the United States exported during 1993, up from 47 percent in 1992. Canada and Mexico imported 14 and 13 percent, respectively, in 1993. Shipments to Mexico, South Korea, and France were down significantly from 1992.

Exports of vegetables increased 15 percent while fruit declined 3 percent. Together they made up 14 percent of U.S. commodity exports. Canada took 35 percent of these U.S. exports, followed by Japan with 18 percent. Mexico maintained its traditional third place in the vegetable market, as did Hong Kong in the fruit market. The United Kingdom reclaimed fourth place in the vegetable market from Taiwan by increasing its imports \$26 million to a total of \$130 million. Taiwan boosted its imports of U.S. fruits by \$8 million (5 percent), maintaining fourth place in that market.

Cotton constituted 4 percent (\$1.5 billion) of U.S. commodity exports in 1993 and 5 percent in 1992. South Korea and Japan remained the leading markets, taking 20 and 17 percent, respectively, of U.S. cotton exports while trimming their purchases 34 and 14 percent, respectively, from 1992. U.S. cotton exports were down from \$2.1 billion in 1992, primarily because of large supplies among foreign exporters such as the FSU, India, Pakistan, and China. Large supplies and sluggish economic growth by major cotton importers drove prices down in 1993. Lower prices and reduced U.S. export volume pushed the value of U.S. cotton exports down 30 percent.

Japan imported 22 percent of the \$1.4 billion of U.S. unmanufactured tobacco exports, down 9 percent from 1992, while Germany purchased 17 percent, up 15 percent from 1992. Turkey, which has expanded its tobacco-processing facilities and boosted its manufactured tobacco exports, maintained its position as the fourth largest U.S. market. Belgium and Luxembourg advanced from the 12th largest market in 1992 to 8th in 1993 by boosting imports of U.S. tobacco from \$39 million to \$47 million.

Canada maintained the position of the leading market for U.S. poultry exports. Mexico moved up to the second largest market and Hong Kong rose from fourth to third, followed by Japan. All four of these top markets for U.S. poultry and products took 62 percent of the \$1.3 billion in U.S. poultry and products exports in 1993. Poland tripled its

imports of U.S. poultry, jumping from 19th place in 1992 to 5th in 1993.

The Pacific Rim markets of South Korea, Japan, and Taiwan together purchased 74 percent of the \$1.3 billion of U.S. exports of hides and skins in 1993 and 72 percent in 1992. South Korea bought over 40 percent of these U.S. exports in 1993, followed by Japan, Taiwan, Mexico, and Canada.

Japan, the largest importer of U.S. feeds and fodders, boosted the value and volume of its imports 12 percent, taking 36 percent of this \$1.3 billion export category in 1993. Canada, Mexico, and the Netherlands were the next largest markets. (*Cecil W. Davison, Commodity and Trade Analysis Branch, 202-219-0822*)

SUMMARY OF REPORT #TB-1830

New Model Can Assist NAFTA Analysis for Trade in Animal Products

December 1993

Contact: William F. Hahn, (202) 219-0712

A new mathematical programming model can help analyze the effects on the animal products trade under NAFTA, the North American Free Trade Agreement among the United States, Canada, and Mexico. The model can predict how changes in policies will affect the longrun production, trade, and prices of animals, meats, and dairy products of the three North American nations. This technical report, *North American Trade Model for Animal Products* from the USDA's Economic Research Service, describes the basic structure of the North American animal products industries and discusses the important policies that affect trade in animals and their products in North America. The model, called NATMAP, makes possible predictions as to how changes in government policies, income growth, and varying costs of production can affect trade, production, and prices of animal products under the NAFTA agreement.

The report features a technical discussion of the economic theories underlying the model. The NATMAP model is based on the economic theory that competitive economies produce socially "ideal" patterns of production, consumption, and trade. NATMAP combines mathematical techniques with data on supply and demand to find optimal patterns of production and trade. The program calculates the socially ideal pattern of production and trade and allows the user to compare the patterns that result from changing policies and varying consumer incomes and production costs.

The Program Can Be Customized for Specific Uses

The documentation describes how a user can construct a specialized version of NATMAP for more customized longrun predictions. The ERS model runs on the General Algebraic Modeling System (GAMS) software, a system for mathematical programming. The baseline can be readily reconstructed with relevant and current data.

The Entire Program, User-Ready, Is Included in the Report

A user need only add an appropriate set of baseline assumptions to construct the customized working model. The documentation describes the construction of such a baseline. NATMAP has unusual latitude in specifying the economic parameters of the animal products industry. Two other appendixes provide further highly technical information on the NATMAP model, which is a static, spatial equilibrium, nonlinear, mathematical programming model. NATMAP uses cost minimization instead of surplus maximization to solve for prices, production, trade, and consumption. A discussion is given of the use of this cost minimization approach and its theoretical validity, and a final section provides GAMS programs for calculating the demand parameters for two different demand systems.

To Order This Report...

The information presented here is excerpted from *North American Trade Model for Animal Products*, TB-1830, by William F. Hahn. The cost is \$12.00.

To order, dial 1-800-999-6779 (toll free in the United States and Canada) and ask for the report by title.

Please add 25 percent to foreign addresses (including Canada). Charge to VISA or MasterCard. Or send a check (made payable to ERS-NASS) to:

ERS-NASS
